**Subject:** McMillin Bridge

Roger: I would like to be added to your list of “consulting parties” for this project. My interest comes from being a bridge engineer for my entire engineering career, including serving as the Bridge & Structures Engineer for WSDOT (1972-1989) and subsequent bridge engineering activity in the private sector. I have also become involved with the ASCE History & Heritage Committee, so I am interested not only in its unique design, but also its place in history.

Stewart Gloyd, P.E.
